The Bank recognises provisions only when it has a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and when a reliable estimate of the amount of the obligation can be made.

Contingent liabilities are recognised on the obligations the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the bank.

### 2.9.2 Investments (categorized and reported as per Bangladesh Bank)

All investment securities are initially recognised at cost, including acquisition charges associated with the investment. #### Held To Maturity (HTM)

Investments which have fixed or determinable payments and fixed maturity that the group has the positive intent and ability to held to maturity, other than those that meet the definition of 'Held at amortised cost others' are classified as held to maturity. These investment are subsequently measured at amortised cost, less any provision for impairment in value. Amortised cost is calculated by taking into account any discount or premium in acquisition. Any gain or loss on such investments is recognised in the statement of income when the investment is de-recognised or impaired.

#### Held For Trading (HFT)

Investments classified in this category are acquired principally for the purpose of selling or repurchasing - in short trading or if designated as such by the management. HTM securities are also revalued if they are reclassified to HFT category with the Board's approval.

#### Investment in quoted securities

These securities are bought and held primarily for the purpose of selling them in the future or holding for dividend income, which are reported at cost. Unrealised gains are not recognised in the profit and loss statement. But required provisions are kept for diminution in value of investment.

#### Investment in unquoted securities

Investment in unlisted securities is reported at cost under cost method. Provision is made for any shortage of book value over cost comparing with the book value of the last audited balance sheet.

#### Investment in subsidiaries and associates in separate financial statements

**Subsequent costs**

Subsequent costs of enhancement of existing assets are recognised as an addition to the asset, only when it is probable that future economic benefits associated with the item will flow to the bank and the cost of the item can be measured reliably. ## Notes to the financial statements as at and for the half year ended 30 June 2023

\*In the consolidated financial statements, BRAC bank's policies for useful life and rates of all fixed assets are applied including all of the classes of assets of subsidiaries to meet the requirement of uniform accounting policy as per IFRS 10.

### Gain or loss on disposal of PPE

Sale price of fixed assets are determined on the basis of fair value of the assets. Gain or loss on sale of assets are recognised in the profit and loss account as per provision of IAS 16 Property, Plant and Equipment.

### Impairment of PPE

At each balance sheet date, the bank assesses whether there is any indication that the carrying amount of the asset exceeds its recoverable amount. If any such indication exists, the Bank should estimate the recoverable amount of the asset. An asset is carried at more than its recoverable amount if its carrying amount exceeds the amount to be recovered through use or sale of the asset. If this is the case, the asset is described as impaired and impairment loss is recognised as an expense in the profit and loss account unless the asset is carried at revalued amount in accordance with IAS 16 Property, Plant and Equipment, in which case any impairment loss of a revalued asset should be treated as revaluation decrease under the accounting standard. No impairment loss was recognised up to the reporting period in separate financial statement, as no such indication existed as on the balance sheet date.

## B. Intangible assets

### Software

Software acquired by the bank is stated at cost less accumulated amortisation and accumulated impairment losses. Subsequent expenditure on software assets is capitalised only when it increases future economic benefits embodied in the specific asset to which it relates. All expenditure is expensed as incurred. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful life of the software, from the date that it is available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life of software is five to ten years. Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted, if appropriate.

### License

Value of the license is recognised at cost less accumulated impairment losses.

### Goodwill

Goodwill that arises upon the acquisition of subsidiaries represents the excess of the fair value of the purchase consideration over the fair value of the BRAC Bank group's share of the assets acquired and the liabilities and contingent liabilities assumed on the date of the acquisition and is measured at cost less accumulated impairment losses in accordance with IFRS 3 Business Combinations and IAS 36 Impairment of Assets.

### Impairment of intangible assets

Intangible assets with indefinite useful life, like goodwill etc., are tested for impairment at the end of each year. As per IAS 36 Impairment, any intangible assets with definite useful life are first reviewed for any indication of impairment. If any indication exists, then the impairment test is carried out.

## C. IFRS 16 "Leases" and its relevant assumptions and disclosures

IFRS 16: "Leases" has come into force on 1 January 2019, as adopted by the Institute of Chartered Accountants of Bangladesh (ICAB). BRAC Bank applied IFRS 16 using modified retrospective approach where the bank measured the lease liability at the present value of the remaining lease payments, discounted it using the bank's incremental borrowing rate at the date of initial application, and recognised a right-of-use asset at the date of the initial application on a lease by lease basis.

### Right-of-use assets

The Bank recognises right-of-use assets at the date of initial application of IFRS 16. Right-of-use assets are measured at cost, less any accumulated depreciation, and adjusted for any re-measurement of lease liabilities. Right-of-use assets are depreciated on a straight-line basis over the lease term. The right-of-use assets are presented under property, plant and equipment.

### Lease liabilities

At the commencement date of the lease, the bank recognises lease liabilities measured at the present value of lease payments to be made over the lease term using incremental borrowing rate at the date of initial application. Lease liability is measured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments, and re-measuring the carrying amount to reflect any interest on the lease liability in each period during the lease term shall be the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability.

### Short-term leases and leases of low value assets

The Bank has elected not to recognise right-of-use assets and lease liabilities for leases of low value assets and short-term leases, i.e. for which the lease term ends within 12 months of the date of initial application. The Bank recognises lease payments associated with these leases as an expense. The contracts for premises with all branches, head office, regional offices, data centers and disaster recovery centers are considered for lease calculation.

### Accounting of lease modification

IFRS 16 defines a modification as a change in the scope of a lease, or the consideration for a lease, that was not part of the original terms and conditions of the lease. Any change that is triggered by a clause that is already part of the original lease contract (including changes due to a market rent review clause or the exercise of an extension option) is not regarded as a modification.

### Gain or loss on termination of lease agreements

As per IFRS-16, if the lease is modified to terminate the right of use of one or more underlying assets or to shorten the contractual lease term, the bank (lessee) remeasures the lease liability at the effective date of the modification using a revised discount rate. Furthermore, it decreases the carrying amount of the right-of-use assets to reflect the partial or full termination of the lease. Any gain or loss relating to the partial or full termination is recognised in profit or loss.
